

1. Valeur actuelle d'une rente certaine de 1 euro par an

Description

Ce tableau vous permet de convertir une rente temporaire en capital. Les coefficients de conversion sont calculés selon la méthode de la **rente certaine**, c'est-à-dire en supposant que le versement des différents arrérages sont certains et ne dépendent pas de la survie du bénéficiaire.

Mode d'emploi

1. Choix de la ligne: définissez la durée (en nombre d'années) de la rente.
2. Choix de la colonne: définissez le taux d'intérêt net annuel auquel le capital pourra être placé.
3. Multipliez le coefficient par le montant annuel total de la rente, tant pour des paiements annuels que mensuels.

1. Valeur actuelle d'une rente certaine de 1 euro par an

Description

Ce tableau vous permet de convertir une rente temporaire en capital. Les coefficients de conversion sont calculés selon la méthode de la **rente certaine**, c'est-à-dire en supposant que le versement des différents arrérages sont certains et ne dépendent pas de la survie du bénéficiaire.

Mode d'emploi

1. Choix de la ligne: définissez la durée (en nombre d'années) de la rente.
2. Choix de la colonne: définissez le taux d'intérêt net annuel auquel le capital pourra être placé.
3. Multipliez le coefficient par le montant annuel total de la rente, tant pour des paiements annuels que mensuels.
